

Repairs to Waterfront Walkway - Parksville Community Park

The first phase of the City's waterfront walkway replacement project will begin on September 9 and is expected to be complete near the end of October. An area of the walkway, about 375 square metres or just over 4,000 square feet adjacent to the waterfront gazebo and the sandcastles area will undergo replacement of timber decking and curbing. As well, the two long curved benches will be replaced. Subsequent phases over the next three to four years will see replacement of the entire waterfront walkway.

During the work, this section of the waterfront walkway will be closed to the public and park users will need to reroute through the Parksville Community Park. Signage, fencing and barricades will indicate the work zone.
